

## FROM DESTRUCTION TO NEW LIFE

### VISION OF THE PROJECT

The purpose of the project was to restore and transform the presence of a school courtyard into a landscape park. The main goal was emotional rehabilitation and the restoration of faith in the future for students who had experienced occupation. The project aimed to involve students, volunteers, and the active community to create not only a place to wait for a school bus but also an emotionally significant space for children who had experienced the horrors of occupation and military events.

The project included the creation of a landscape architecture work, considering inclusivity requirements and environmental friendliness. It used renewable materials and encouraged active community participation for the sustainable development of the region.
