

The Gothic Garden of the Organ Hall - a new cultural space in Rivne as an ecological renovation of the territory of the architectural monument

Vision of the project

The Project involved experts from urbanists, architects, landscape designers, cultural heritage specialists, historians, local historians, artists, environmentalists and community representatives. Experts has jointly conducted research and discussed the issues of Rivne's urban identity, prepared practical recommendations and a technical order, on the basis of which an architectural project for the creation of the Gothic Garden of the Organ Hall will be developed. The concept of the site's redevelopment takes into account the neo-Gothic style of the building and the traditions of the residences of the Lubomirski princely family, who are the founders of the former St. Anthony's Church in the 18th and 19th centuries.

The Lubomirski family made a significant contribution to the cultural and economic development of Rivne, but the historical memory of this fact was leveled and destroyed by the Soviet authorities. As part of the Project, the team and active citizens worked together to clean up the territory of the future garden and plant vertical fence plants and a public presentation of the finished architectural project "Gothic Garden of the Organ Hall" was held. Finally, the first of the open-air concerts with the participation of a chamber orchestra was organized. This ensures that the Chamber and Organ Music Hall will become a real tourist magnet in Rivne in the future. The project is cross-sectoral, linking the sectors of urbanism, cultural heritage, music, ecology, and local tourism development. The project created a concept of a creative cultural space accessible to the community, tourists and guests of Rivne.

Meet the Key Partner

Rivne Regional Philharmonic aims to develop musical culture and provide meaningful leisure for the community. Since the beginning of the full-scale invasion, the Philharmonic has intensified its work, opened an "artistic basement" - a concert location in a shelter and has examples of successfully implemented projects, including local history, children's and IDP projects.

ГРОМАДСЬКА ТОЛОКА

Екологічна акція з впорядкування території Залу камерної та органної музики та висаджування рослин на ділянці із залученням громадськості міста.

Що ми зробили:

- зібрали команду волонтерів та однодумців;
- розділили територію на зони та розподілили обов'язки по благоустрою;
- прибрали територію;
- підготували ґрунт;
- висадили багаторічні рослини вертикального озеленення;
- поспілкувались про актуальність ідеї «Готичного саду» для громади Рівного;
- пригостили учасників толоки запашним трав'яним чаєм;
- провели опитування щодо відгуків про подію;
- зібрали ідеї та побажання присутніх щодо проєкту.
